

The Exclusive Meyer Multi-Bag Filtration System

The Hi-Range uses our **exclusive multi-bag filtration** system and clean-air fan design, guaranteeing it will always operate at **peak performance and provide years of trouble-free operation.**

The filtration system, designed to remove heavy debris and fine

particles from the airstream before they reach the fan, enables Meyer to utilize a **higher performance fan** that is capable of providing the optimal balance of airflow and static pressure needed to clean HVAC systems.

Maintenance is limited to routine engine service and periodic

inspection of the filter bags. Structural integrity for rough over-the-road service is built into every Meyer trailer and truck mount vacuum. The heavy-gauge steel shell is reinforced from within and all seams are **continuously seal welded.** All Meyer trailer and truck mount vacuums are convenient to install, easy to maintain and profitable to operate.

Engineered to Perform
Built to Last

All you need for professional air duct cleaning.

Wm. W. Meyer & Sons, Inc. has been a technology leader for three generations, designing innovative vacuum collection and pneumatic conveying systems since 1933. With over 100 employees, Meyer is **by far the largest** manufacturer of vacuums for the Indoor Air Quality Industry. From residential and commercial HEPA filtered units to trailer-mounted, truck-mounted and portable electric and gas powered vacuums, Meyer has a machine to meet your specific needs. **We're the only company that offers it all.**

HI-RANGE™ VAC

Top-Of-The-Line Vacuum For Truck Or Trailer Installation

The High-Powered Workhorse

The Hi-Range Vac by **Wm. W. Meyer & Sons, Inc.** is a completely self-contained unit that mounts in any standard 14' truck body or 16' cargo trailer. This top-of-the-line model **boasts the highest static pressure rating of any vacuum currently available** for duct cleaning. More vacuum energy at the "business end" of the hose means more effective debris removal.

Helps You Handle The Big Jobs

The Hi-Range Vac operates with **hose runs up to four times longer** than conventional vacuums yet maintains the high velocity necessary to pull debris through the HVAC system and into its generous 28 cubic foot hopper.

65 HP Wisconsin gas engine

Build Profits In Residential And Commercial Markets

Not only is the **demand skyrocketing** for professional air duct cleaning, but **expectations are high** for continued industry growth. Air duct cleaning, residential and commercial, is a highly profitable enterprise. The Hi-Range Vac can do it all.

Hi-Range Vac Features And Advantages At A Glance

- Choice of two powerful engines in diesel or gasoline.
- Direct drive for simplicity and reliability.
- Large debris hopper with full-width cleanout door.
- Truck or trailer mount—you furnish vehicle or we supply complete package.

- 39" diameter, 24 blade dynamically and statically balanced turbo fan generates high static pressure.
- Self-contained design: simple vehicle installation and easy maintenance.
- Unique, enclosed two-stage filtration system.
- Clean-air impeller.
- Two-year warranty.

HI-RANGE™ VAC

Hi-Range Vac Specifications

Weight	1850 Lbs.
Inlet Diameter	10"
Static Pressure	40" W.C.
Engine	65 HP, Air Cooled Gas or Hydraulic Power-Take-Off
Fan Type	Closed-face Turbo Fan
Electrical	12 Volt/Starter
Filtration	50 Dacron® Bags
Instrumentation	Tachometer, Hour Meter, Voltmeter, Temperature Gauge, Oil Pressure Gauge
Hopper Capacity	28 Cu.Ft.
Fuel Tank	6.6 Gallon (two provided)
Length	121"
Width	53"
Height	68"
